BEST TRACK ENTERPRISE LIMITED

“BEST TRACK ENTERPRISE LIMITED” (BTEL) has proudly established themselves in the fall of 2020 with its undoubted potentials like the proficiencies and effectiveness of employees, paired with innovative ideas and having the support of modern technology in every necessary site; for the completion of operations to a level of full satisfaction. In a dynamic and rapidly changing industry of export/import logistics, BTEL has taken its step to emerge as a leading and the most capable Management Company mainly focusing on Shipping and as well as Aviation & Logistics sectors.

BTEL & Its Associates have gathered together and have agreed to form a cooperation with the finest personnel in the line of shipping, aviation and various types of trading; with each member containing vast knowledge and experiences in these sectors. With the utmost capability we have, our goal is to evolve into a trustworthy and comprehensive one-stop service provider to our Clients & Principles. Our focus has not only been single sighted on developing but it has also been to distribute our services in multiple sectors and in various locations worldwide which has made it possible for us to form a solid level of efficiency in a range of expertise and to form a powerful connection of network world wide.

BEST TRACK ENTERPRISE LIMITED

BEST TRACK ENTERPRISE LIMITED

SHIPPING/NVOCC

In the recent world of cargo movements, a significant majority of it is carried out by container ships, break a bulk carries, bulk ships, roro vessels etc. In order to save shipment costs. Our organization is excellent in handling all types of containers, ships and cargo (within any type, size & weight) no, matter how crucial a situation might be. In any form of circumstances, in any part of the world, our highly experienced team is always ready to move and deliver our clients product / consignment.

At the same time, our major principal is that we are happy to handle their ships and containers, (as thier agents) our undoubtedly skilful team which we were able to form in this specific sector for many years of working in this field.

AVIATION

Air Freight / Air Freight Logistics is an arrangement of shipment of goods via chartered or scheduled through air carriers. For the case of time sensitive cargos and other sensible goods, shipment by air-carrier is the most efficient way to rely on. We offer reliable and prompt international air freight forwarding services with the best routes that meet our client's demands. We handle a variety of product lines for air export or import. Our expertise also extends services to handle cargo and passenger carriers in a very significant manner, keeping in mind to our Client's & Principal's full satisfaction.

PROJECT LOGISTICS AND GENERAL FORWARDING

BTEL & its Associates are both unmatched and flawless in all forms of shipping/shipment, handling of cargo movements and transportation related activities because of our uniquely modern structure, techniques and experience in the line of work worldwide. We have been believed to be dependable due to our ability to provide clients with the support of handling shipments by sea or air or by air/sea or by sea/air or by air/air – sea/sea, combined transport etc. that is for every possible types of port to port, door to door, ex. works/EXW, DDU/DDP/DAP etc. types of shipments.

Overall BTEL & Its associates are extra ordinary in manoeuvring of normal sized/normal weighted cargo and are also very structured in operating of over sized/heavy weighted cargo of special consignments for special projects.

Our team assures to provide the best facility in handling of cargo with the top most standard for export or import consignment by container shipment (LCL or FCL or by ISO Tank, FR OT and etc). or by RORO/ break bulk shipment, by passenger carrier/ by freighter, by rail or road etc. i.e. all methods of transportations.

It is necessary to mention here that “BEST TRACKENTERPRISE LIMITED” (BTEL) always proudly acknowledges every support and kind cooperation from its valued clients, oversees principals, shipping/air carriers and local & worldwide business agents/ associates without which the prosper and success of our company would not have been possible.

DOMESTIC TRANSPORTATION AND CUSTOM CLEARANCE

BTEL & Its associates provide solutions about local & overseas transportation. We have developed an impressive national transportation infrastructure. Our transportation team has extensive experience in domestic transport & shipping services such as over the road/inland trucking by truck, lorry, trailer, pick up van etc. Drayage services according to the clients specific needs and by river as well (by Barge etc.) Our focus on door to door transportation services allows us to pick up from and deliver on time to both large metropolitan, secondary, and off the grid markets. Our efficient transportation system allows our clients to

focus more on their business and what they do best. We are highly experienced in terms of Custom Clearance. Our team has perfect knowledge about handling tax/duty matters in relevant terms and exemptions matters in this regard. Our professional and experienced team have excellent relationships with all levels at customs and National Board of Revenue (NBR) and it helps us to handle import/exports matters on time for usual commercial items/shipments and Government/Non Government big projects.

ENGINEERING SOLUTIONS

Engineering supports are specially needed generally handling Project/cargo. In any case of necessity, our own qualified Engineering team provides support as well as to create any of Civil or / & Mechanical structure. In case of Heavy-Lifting cargo movements and other many purposes, Our engineering team arranges inspection of goods for proper transportation and calculates proper weight distribution on vehicle or barge. For proper transportation, to check about all safety matters (including proper lashing)

is also important. Our engineering team follows these matters & measures. In case of shipment by river/canal our engineering team arrange smooth movements by properly using a dredging machine/ excavator etc. Our engineering team supports clients by arranging various types of heavy equipment like cranes etc., as per the demand of any project. This team also provides support to our clients about assembling & dismantling of their machines and equipment.

OTHERS

BTEL & Its team provides support on other related matters like for IOR/ EOR (importer of record/exporter of record) Insurance Production follow up, survey etc. We, along with our worldwide efficient network are dedicated to working for each client at a time at the cargo origin points and as well as at the cargo destination points. We are also capable of providing a satisfactory service(s), as per the requirements (s), from a third country or from other countries also through our qualified business associates in respective areas.
